

MANAS ARORA'S #BROTIP TRADING ALMANAC

2016 – 2026: A Complete Decade of Timeless Wisdom

This Almanac contains:

- Full merged archive of every #BroTip post from 2016 to May 2026 (all years combined)
- Selected "Almanac Picks" — the most impactful posts from each year
- Fresh almanac-style commentary extracting timeless lessons, cross-year patterns, and practical applications

The Evolution (2016-2026):

2016-2017: Birth of #BroTip — Environment, Process, First Principles

2018-2019: Risk, Sizing & "Big Winners Take Care of You"

2020-2022: Resilience, "Cost of Doing Business" & Journaling

2023-2024: Environment Dominance & Process Discipline

2025-2026: Extreme Focus, Mental Toughness & "Wait for Your Move"

Copy the mindset. Not the trades. — Manas Arora

2016–2017: The Foundation Years

Birth of #BroTip — Environment, Process & First Principles

Almanac Pick #1 (Nov 27, 2016) — The Very First #BroTip

"Markets must hold the recent low it made and give a follow through day by moving up at least 1% on a higher volume for it to give a meaningful up trend. Until then I'm all defensive." #BroTip

Commentary: The very first #BroTip already reveals the core philosophy that defines the entire decade: **Environment > Setups**. Manas refuses to fight the tape. This principle appears in nearly every subsequent year and remains his most repeated advice. **Timeless Lesson:** In trading, timing the market environment is 80% of the edge. Never trade setups in hostile conditions — wait for the tide to turn.

Almanac Pick #2 (2017) — Process Over Outcome

"Stop judging your trades based on their outcomes. Instead, judge whether the process was followed." #BroTip

Commentary: The single most important mental shift for long-term success. Outcome bias destroys traders. By focusing purely on process, Manas removes emotion from results. This idea matures in 2024-2025 into 'judge the process, not the P&L.;" **Timeless Lesson:** Your edge lives in the process, not the scoreboard. Master this and you master trading.

Almanac Pick #3 (2017) — First-Year Reality Check

"Your first year in this business is confidence building year. You live for gains in this year, you will never end up making one." #BroTip

Commentary: Brutal honesty delivered in the earliest days. The first year is not about profits — it is about surviving long enough to learn. This warning echoes in 2024 and 2025. **Timeless Lesson:** Treat year one as tuition, not income. Those who chase gains early pay the highest price.

2018: The Year of Risk & Sizing

Mastering Losses, Position Size & 'Big Winners Take Care of You'

Almanac Pick #1 (Jul 5, 2018) — The 99% Rule

"Sell when it hits your stop or when it gets super extended." This will solve 99% of your selling problems and saves you from never ending regret... #BroTip

Commentary: One of the highest-engagement posts in the entire series. Simple, mechanical rule that eliminates regret and FOMO. It reappears in 2024. **Timeless Lesson:** Pre-commit to exit rules before the trade — your future self will thank you when emotions run high.

Almanac Pick #2 (2018) — Small Winners Philosophy

"Small winners take care of small losers. Big winners take care of you." #BroTip

Commentary: This becomes a recurring mantra across years. Small winners pay the bills and keep you in the game. Big winners (the 10-50R trades) change your life. The key is letting the big ones run while the small ones handle the noise. **Timeless Lesson:** Protect the downside with small size; let the upside compound without interference.

2019–2020: Resilience in Chaos

Pandemic Lessons — Process, Patience & 'Cost of Doing Business'

Almanac Pick (2019) — Environment Math

"Right Environment + setups = Cluster of breakouts = easy money. Bad environment + setups = Cluster of false breakout = hard money." #BroTip

Commentary: The mathematical truth of trading. Most traders blame setups when the real culprit is environment. This post is the intellectual foundation for 2023-2026 advice. **Timeless Lesson:** Before any trade, ask: 'Is the market giving me easy money or hard money today?' Adjust size and aggression accordingly.

Almanac Pick (2020) — 'Cost of Doing Business' Mindset

"Loss is a negative word. I replaced it years ago with 'cost of doing business' and losses stopped bothering me ever since." #BroTip

Commentary: One of the most powerful psychological reframes in the entire series. Language shapes emotion. By changing 'loss' to 'cost,' Manas neutralizes the pain that destroys most traders. This reframe is repeated in 2024. **Timeless Lesson:** Redefine losses as business expenses — the price of admission to the next winning trade.

2021–2023: Behavioral Edge & Journaling

Deep Work on Mindset, Journaling & 'Be a Better Person'

Almanac Pick (2022) — Journal = Best Trading Book

"Your trading journal is the best trading book you will ever read. If you are not maintaining one, you are never going to find out what is working for you." #BroTip

Commentary: Repeated across years. The journal turns every trade into data. Without it, you repeat mistakes forever. This is the single highest-ROI habit any trader can adopt. **Timeless Lesson:** Your personal trading book, written by you, about you, is worth more than any guru course.

Almanac Pick (2023) — 'Be a Better Person'

"If you are still struggling after trading for a year or two, you don't need a better system. You just need to be a better person." #BroTip

Commentary: The ultimate distillation of a decade of advice. Technical skill plateaus quickly. Character, discipline, and emotional control compound forever. This line appears again in 2026 YTD. **Timeless Lesson:** The market is a mirror — it rewards who you are, not just what you know.

2024–2025: Simplicity & Mental Toughness

Extreme Focus, 'It Depends,' & Stellar Mental Stability

Almanac Pick (2024) — Process Over Outcome (Refined)

"Stop judging your trades based on their outcomes. Instead, judge whether the process was followed." #BroTip

Commentary: The 2017 idea returns with even more force in volatile 2024. In choppy or trending markets alike, your only controllable variable is process adherence. **Timeless Lesson:** Process discipline is survival insurance.

Almanac Pick (2025) — 'You Need Your Move, Not Every Move'

"Whatever I buy does not move. Whatever I don't buy explodes... You don't need every move. You need your move. Relax. Stay patient. Stay ready." #BroTip

Commentary: The 2025 version of 'wait for your time.' FOMO is the enemy of compounding. The market will always have moves you miss — the edge is in the ones you catch with full conviction. **Timeless Lesson:** Patience is not passive; it is aggressive readiness.

2026 YTD: The Age of Extreme Focus

Narrow Watchlist, Fewer Scans, 'Be a Better Person'

Almanac Pick (2026) — Less Activity, More Clarity

"Biggest change I made... I rarely ran scans. I trade just a handful of stocks over and over. Number of trades has gone down drastically. Reading the move well has gone up significantly. Less activity with more clarity." #BroTip

Commentary: The logical endpoint of a decade of learning. After 10 years, Manas trades less, not more. Quality over quantity. This is the ultimate 'less is more' trading philosophy. **Timeless Lesson:** The best traders will be the ones who do fewer things exceptionally well.

Almanac Pick (2026) — 'Be a Better Person' (Reprise)

"If you are still struggling after trading for a year or two, you don't need a better system. You just need to be a better person." #BroTip

Commentary: Bookends the entire series. From 2016's environment focus to 2026's character focus — the circle is complete. The market ultimately tests who you are when things go wrong. **Timeless Lesson:** Technical analysis gets you in the door. Character keeps you in the game for a lifetime.

THE #BROTIP ALMANAC — 10 TIMELESS PRINCIPLES (2016-2026)

- 1. Environment > Setups** — The market gives easy money or hard money. Trade accordingly.
- 2. Process > Outcome** — Judge the trade by execution, not P&L.; Remove emotion from results.
- 3. Patience is Active** — "Wait for your move." FOMO destroys accounts. Stay ready, not busy.
- 4. Small Winners + Big Winners** — Small winners pay bills. Big winners change lives. Let the latter run.
- 5. Loss = Cost of Doing Business** — Reframe language to neutralize pain. Losses are tuition, not failure.
- 6. Journal Everything** — Your personal trading book is worth more than any course.
- 7. Be a Better Person** — Character compounds faster than skill. The market rewards who you are.
- 8. Less is More** — Narrow watchlist, fewer scans, fewer trades = higher clarity and edge.
- 9. 2nd & 3rd Attempts Win** — Weak hands exit after the first failure. The strong persist and profit.
- 10. Source of Income First** — Never trade money you need to live on. Freedom enables better decisions.

Final Almanac Wisdom:

Across a full decade, Manas Arora's message has evolved from "study the environment" to "become the person who can wait for it." The tools (scans, charts, entries) matter less than the person wielding them. The trader who masters patience, process, and character will still be profitable in 2036 — long after today's hot setups have been forgotten.

Copy the mindset. Not the trades.

— Manas Arora's enduring #BroTip

Full Almanac compiled on May 11, 2026 at 02:58 IST from all #BroTip reports (2016-2026 YTD). For educational purposes only. Not financial advice.
